

CONTEC PREFAB  
**HIGH PERFORMANCE  
CONCRETE**

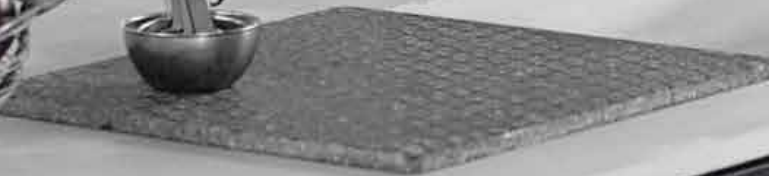

# ABOUT CONTEC PREFAB A/S

Contec Prefab A/S is a pioneering company based on 20 years of experience with high performance concrete (HPC) within the Contec Group. Contec Prefab was established in 2008 and has developed experience in providing innovative and customized solutions in HPC in close cooperation with many professional partners. Standard solutions and wholly new customised solutions become reality in close cooperation with our in-house designers, architects and technical staff. Common for all solutions is that they take advantage of our advanced high performance concrete and the outstanding possibilities for unique and slim constructions it provides.

In 2014 Contec Prefab A/S bought TerrazzoForum ApS, a manufacturing company specialized in terrazzo. Contec Prefab A/S has thus expanded its product catalogue significantly with even more exciting solutions.

# CONCRETE AESTHETICS

## IN KITCHEN & BATH

Whether it is your kitchen or your bath, you can find your new concrete tabletop at Contec Prefab and the opportunities are many. We create tabletops according to your wishes and your home. Clean lines, sealed and elegant surfaces are characterising for the products we design and manufacture with our customised high performance concrete. All our products are Danish manufactured, handmade and first quality.

We are in constant development and both our reference and product catalogue is expanding all the time to the delight of our many customers. With a tabletop made from Contec high performance concrete you will have free choice of shape, gloss, finish, texture, expression and colour as our high performance concrete universe is endless and only the sky is the limit.

# TABLETOPS

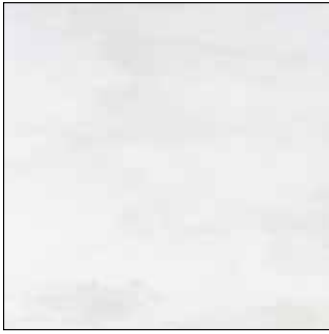

## FOR EVERY ROOM

Contec Prefab also produces tabletops for many other purposes. Tabletops from Contec Prefab are both lightweight and elegant both physically and aesthetically, which creates brand new opportunities for the manufacturing of different, creative and exclusive tables for all spaces. We assess your personal wishes and stretch the limits of lines, surfaces and shapes, and challenge the common norms and standards within the concrete industry.

Contec Prefab has through a range of indoor and outdoor deliveries for restaurants, hotels and private customers gained valuable experience within this segment, which enables us to manufacture tabletops of first quality. Whether it is a dining table, a desk, a bedside table, a coffee table, a windowsill or something completely different you need, we are ready to help you.

Section		

# HIGH PERFORMANCE CONCRETE SPECIFICATIONS

## **STANDARD TERRAZZO COLOURS**

As concrete is a natural material, colour differences can occur. The illustrated standard colours are therefore guiding! Customised terrazzo and concrete colours can be manufactured at an added cost. Please contact your supplier to hear more.

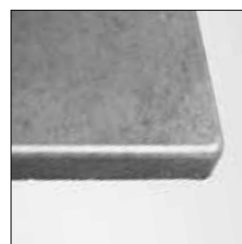

## **STANDARD EDGE PROFILES**

Our selection of edge profiles covers the most common edge profiles, but it is always a possibility to have customised edge profiles manufactured at an added cost. Please contact your supplier to hear more.

## **BASINS**

We have a wide selection of moulded basins, but we also sell basins from all the leading washbasin manufacturers.

We install all types of basins (steel, porcelain etc.) in our tabletops after guidelines of the manufacturer, either level basins, top-mount basins or undermount basins. This means that the tabletop will be delivered with the basin mounted from our factory.

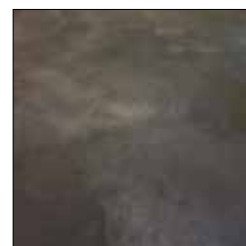

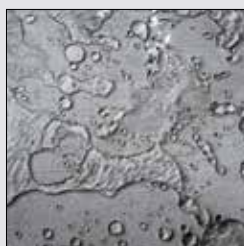

# SALE AND MAINTENANCE

## **DISTRIBUTORS**

Delivery of tabletops happens through professional kitchen and bath distributors in Denmark. They know our products and they know how to implement your ideas. Furthermore, the distributors can take measurements and take care of the installation – both of which are very important for a perfect result. Contact us for information on a distributor near you.

## **MAINTENANCE**

Even the best products will with time need maintenance. With a tabletop from Contec Prefab maintenance is easy and it even supports the natural properties of the material and the distinguished patina, by which the beautiful look is maintained through many years. Talk to your local distributor about the possibilities.

## WORLD LEADERS IN HIGH PERFORMANCE CONCRETE

Contec Prefab A/S is a part of Contec Group who has been a leading company on the international market within high performance concrete since the beginning in 1993. The primary area of business within Contec Group is development and sale of different types of high performance concrete as powder. The different powders are used for projects varying from safes and strongboxes to floors and pavements as well as some of the world's most advanced, prestigious and prominent architectural projects like the Danish Broadcasting Corporation Concert House, Qatar National Museum and Louvre in Abu Dhabi.
